SUMMARY

I am a Senior Software Engineer and AI Enthusiast with over 5 years of experience specializing in high-performance frontend development and MFE architecture. My expertise lies in building scalable AI-powered orchestration platforms and enterprise data products using React.js, NestJS, and Node.js. I am currently expanding my skills in Data Science and Generative AI to shape the future of intelligent, data-driven user interfaces

EXPERIENCE

Software Engineer II (Contingent Worker)

Blue Yonder

📅 04/2024 - 12/2025

A leading supply chain software provider

- Enhanced the frontend of an AI agent-driven application, integrating intelligent assistants for workflow automation and contextual actions
- Contributed to a Micro-Frontend (MFE) UI platform, building features across multiple independently deployed frontend modules
- Developed comprehensive E2E test suites using WebdriverIO, achieving ~90% coverage and reducing regression defects by 30%
- Led the migration from MUI v4 to MUI v5, improving component performance and UI consistency by ~25%
- Engineered scalable enterprise dashboards using React (TypeScript) and Redux, improving real-time data visibility for business operations

Software Engineer II

Divami Design Labs

📅 05/2022

A digital design and development company

- Built responsive, data-driven interfaces using React and Angular, improving usability by ~30%
- Developed interactive dashboards and charts for cloud security and data platforms, improving discoverability by ~35%
- Implemented state management and component-level architecture in React, reducing unnecessary re-renders and improving performance by ~25%
- Increased unit test coverage to 70-80%, reducing production regressions by ~25%
- Implemented modular UI styles using Sass and Bootstrap, reducing UI defects and rework by ~25%

Software Engineer

Sitara Foods

📅 12/2020 - 03/2022

A food processing company

- Built frontend features using React and collaborated with backend APIs developed in NestJS
- Joined as a fresher and mastered React, NestJS, Docker, and deployment workflows in a production environment
- Implemented robust REST API integrations and worked closely with backend teams to deliver end-to-end features
- Leveraged Docker for containerization and supported deployment workflows; utilized Git for code reviews and production debugging

EDUCATION

Master of Computer Applications

Pondicherry Central University

📅 Date period

Bachelor of Computer Applications

Indira Gandhi National Tribal University

📅 Date period

KEY ACHIEVEMENTS

90% E2E Coverage

Successfully automated critical user flows at Blue Yonder using WebdriverIO

Continuous Learning

Actively pursuing certifications in Data Science and GenAI; proficient in Python data analysis libraries for building intelligent dashboards

SKILLS

Gmail	Netlify	React	
TypeScript	NestJS	Node.js	
Python	Pandas	Numpy	E2E
Redux	Angular	Unit Testing	
Modular	SASS	Bootstrap	
Docker	REST	Git	Matplotlib
Seaborn	JavaScript	ES6+	
HTML	Tailwind	Material UI	
Jest	Express.js	GitHub	Agile
JIRA	Confluence	Next.js
